How To Prevent **TICK-BORNE ILLNESSES**

Ticks can spread diseases to the people and pets they attach to, The longer a tick is attached, the more likely you are to contract a disease from the bite. Get educated and stay safe!

TICK REMOVAL

Step #1: Find a pair of fine point tweezers.

Step #2: Grasp the tick with the tweezers as close to the skin as possible.

Step #3: Pull upwards in a slow and steady motion until removed.

Step #4: Wash your hands and the bite area with soap and water.

Step #5: Flush the tick down the toilet or save it in a bag to send in for testing.
